Using Indexes in PyMongo

Fast Lookups: Using Indexes

MongoDB offers
two kinds of
Indexes

Btree Indexes

Geospatial
Indexes

First we need to import:
from pymongo import ASCENDING, DESCENDING

Syntax:
create_index(key_or_list, direction=None, unique = False)

Hands-On

Creating a geospatial index in PyMongo is easy, we have many collection level operations in PyMongo for Geospatial indexes.

- ❑ `pymongo.GEO2D = '2d'`
- ❑ `pymongo.GEOSPHERE = '2dsphere'`
- ❑ `pymongo.HASHED = 'hashed'`
- ❑ `pymongo.TEXT = 'text'`

Hands-On
