

The Vecta Corp. Database

The Status table

The status table will be used to reference the status of an employee interaction with customers / issues. Three status options will be added to this table including Open, In Progress, and Closed. The relationship will be established between the statusid primary key in this table and the statusid foreign key in the tickets table.

Column Name	Data Type	Size	Key
statusid	int / integer		PK
status	varchar	15	

Data

Open

In Progress

Closed
