

The Vecta Corp. Database

The Roles table

The roles table will contain one of three roles assigned to each employees for our fictitious Vecta Corp. company. Employees will either be assigned to first tier support, second tier development, or third tier administration. The roles table will have a direct relationship with the employees table via the roleid primary key and roleid foreign key in the employees table.

Column Name	Data Type	Size	Key
roleid	int / integer		PK
role	varchar	15
